CAREER OBJECTIVE

Analytical and detail-oriented data professional with expertise in data analysis, statistical modeling, machine learning, data pre-processing, Python, R, and SQL. Adept at conducting EDA, cleaning data, and generating actionable insights to support data-driven decisions. Eager to contribute to impactful solutions and learn in a fast-paced, growth-oriented environment.

SKILLS

- **Programming Languages:** Python, R, SQL, C.
- **Machine Learning & AI:** linear regression, logistic regression, nonlinear models, classification, clustering, resampling methods, regularization (Lasso, Ridge), PCA, SVM, tree-based methods (Random Forest, Boosting), and deep learning (CNNs, RNNs).
- **Data Visualization and Analysis:** Tableau, EDA, tidyverse, ggplot2, Pandas, NumPy, Matplotlib, Data Collection, Cleaning.
- **Database Systems:** ORM (PeeWee, SQLAlchemy), Flask, SQLite.
- **Tools:** MySQL, GitHub, RStudio, VS Code, PyCharm, Jupyter Notebook, Word, Excel, PowerPoint.
- **Soft Skills:** Strong Communication, Teamwork, Problem-Solving, Analytical Thinking, Attention to Detail, Cross-Functional.

EDUCATION

Kent State University

Jan 2024 - Dec 2025

Master's, Data Science

GPA: 3.95/4

- Coursework: Machine Learning, Computational Statistics, Applied Statistics, Advanced Database System Design, Data Mining Techniques, Information Visualization, Big Data Analytics.

Srinivasa Ramanujan Institute of Technology

Sep 2019 - Apr 2023

Bachelor's, Electronics and Communication Engineering (ECE)

GPA: 8.61/10

- Relevant Coursework: Data Structures, RDBMS, Cloud Computing, Artificial Intelligence.

PROJECTS

[Link to Portfolio](#) - An overview of my work and projects.

Telecommunications Customer Churn Prediction

Nov 2024 - Dec 2024

- Applied stratified data splitting to handle class imbalance and performed median imputation for missing data. Selected Logistic Regression (ROC AUC: **0.8441**) for its balanced performance and high interpretability in real-world scenarios.
- Conducted outlier detection using IQR and applied log transformations to enhance model robustness. Performed cross-tabulations, Chi-square tests, correlation analysis, and one hot encoding to select features and reduce multicollinearity.
- Evaluated models (Logistic Regression, Random Forest, XGBoost) using key metrics and selected Logistic Regression for its superior handling of imbalanced data. Achieved **90.33%** sensitivity, effectively identifying high-risk churners.
- [Link to Project](#)

Optimizing Resource Utilization on the NERSC Cori

Apr 2024 - May 2024

- Developed Random Forest Regression models to accurately predict power usage, achieving a **66%** improvement in prediction accuracy from the base model.
- Conducted exploratory data analysis & Analyzed workload patterns using heatmap visualization, revealing varying periods of high execution time across different days of the week, which could inform more dynamic resource allocation strategies.
- Compiled, assessed, and visualized data trends using statistical methods, proposing data-driven strategies for potential energy optimization based on power consumption and resource utilization correlations that enhance energy optimization.
- [Link to Project](#)

Bone Fracture Detection Using R-CNN and CrackNet

Jan 2023 - Apr 2023

- Designed and implemented deep learning models (Region-based and Crack Sensitive Convolutional Neural Networks) to automate bone fracture detection, improving detection accuracy by **5%**.
- Modeled and validated ResNet50 in Python using Keras and TensorFlow, achieving **90%** validation accuracy for early diagnosis.
- Extracted, transformed, and visualized medical image data using PIL and Matplotlib, collaborating with a team of 4 to streamline development and achieve **90%** detection accuracy.
- [Link to Project](#)

ON-CAMPUS EXPERIENCE

Kent State University

Kent, OH, USA

Facility Operations Supervisor

Feb 2024 - Present

- Managed and organized university event setups by prioritizing tasks, demonstrating problem-solving, assisting clients, leading a team in facility management, and optimizing audio/visual systems through troubleshooting, teamwork, and leadership.

Srinivasa Ramanujan Institute of Technology

Andhra Pradesh, India

Class Representative

Sep 2019 - Apr 2023

- Facilitated communication among **75+** students and faculty, and supported professors with administrative tasks using leadership, organization, and communication skills.

CERTIFICATIONS & VOLUNTARY EXPERIENCE

- Python Certification through APSSDC (Andhra Pradesh State Skill Development Corporation).
- Served as a National Service Scheme (NSS) volunteer committed to helping society through environmental conservation (SWACHH BHARAT) and community service initiatives, demonstrating leadership and social responsibility.
